

EDIUS X

Software Version 10.34.12119 – Release Notes – August 2023

New Features

EDIUS

- Added a feature to select which one is prioritized when there are both floating license and node-locked license
 - * *By default, node-locked license is prioritized*

Mync

- Added a feature to select which one is prioritized when there are both floating license and node-locked license
 - * *By default, node-locked license is prioritized*

Fixed Issues

EDIUS

- Color picker incorrectly works on 3-Way Color Correction if project is 10bit
- Acon Digital DeNoise Audio Filter has no effect for first 2 seconds of a clip
- If a certain JPEG file is loaded, the image becomes black (SFDC00858876)
- Black frames appear randomly while playing the timeline with HEVC clips

Mync

- If a certain JPEG file is loaded, the image becomes black (SFDC00858876)
- Black frames appear randomly while playing the timeline with HEVC clips
